It is expected that for purpose of such limitation the term Entity shall include reference to Affiliates thereto; (b) A mechanism aimed at preventing abnormally low bids (anti-dumping); (c) A technical proposal and a corresponding quality score, in addition to the price proposal and the price score; (d) Partial reimbursement of expenses incurred in the preparation of the Bids, for the unsuccessful Bidders; and (e) The Members of the Successful Bidders will not be required (compelled) to establish and register a limited liability "special purpose company" or "project company" and can execute the works pursuant to the Agreement as an unincorporated joint venture, on a joint-and-several-liability basis. However, the Members of the Successful Bidders may, if they so choose, execute the works pursuant to the Agreement as an incorporated limited liability "special purpose company", partnership or limited partnership under the Laws of the State of Israel; provided that with respect to each such form of incorporation, the Members of the Successful Bidder will still be required to assume joint-and-several-liability for the execution and completion of the works under the Agreement. The foregoing does not derogate from NTA's and the Tender Committee's rights, prerogatives and discretions pursuant to the Pre-Qualification Document (including pursuant to Section 9 (Discretion and Prerogatives of NTA and the Tender Committee) of the Invitation) and the Tender Documents. 1. INVITATION FOR PRE-QUALIFICATION

1.1. Introduction and General Description of the Programme

NTA – Metropolitan Mass Transit Systems Ltd. (“NTA” or the “Owner”) is a government company tasked with the development of the Tel Aviv Metropolitan Mass Transit System, which includes, *inter alia*, a metro network, comprising three (3) mostly underground metro lines of approximately 150 kilometers in length and 109 stations (the “Programme” or “Network”).

The Tender Committee is issuing this Invitation in order to identify Eligible Participants, which will be invited to participate in future Tenders for the design and execution of the first stage of the Programme (“**Stage 1**”), which is comprised of a total of 76 kilometers of tunnels and 59 stations, divided into eleven (11) Infra #1 Work Packages.

General, indicative information with respect to the Programme and the Infra #1 Work Packages is detailed in **Annex “B”** (General Description of the Programme).

As is evident from the general description of the Programme, it is challenging and complex, with unique characteristics, technical features, restrictions and execution restraints. It involves complex interfaces, including, *inter alia*, with relevant authorities (governmental as well as municipal), other means of public transportation and other transportation projects. The implementation of the Programme and each of the Infra #1 Work Package will require, *inter alia*, coordination and management of different professional disciplines, with different Entities, project managers, designers, service providers, taking into account the dynamic nature of the Programme. Bearing this complexity in mind, the Tender Committee places great importance on the process of identifying Entities which possess the required professional experience and capabilities.

1.2. Invitation for Pre-Qualification

The Tender Committee hereby invites Entities to participate in the Pre-Qualification Process, according to the terms and conditions of this Invitation.

1.3. The Selection Process

At present and in very general terms, the Tender Committee intends to conduct this Pre-Qualification Process, following which Eligible Participants will be invited to participate (if they so choose, and subject to the expected requirements specified herein), in (various) individual Tenders with respect to the aforementioned Infra #1 Work Packages, in each of which a prospective Eligible Participant will be declared as a Successful Bidder and selected to perform one or more designated Infra #1 Work Package(s).

For avoidance of doubt, an Eligible Participant may be announced as a Successful Bidder in more than one (1) Tender, subject to conditions which will be specified in the Tender Documents.

1.4. The Pre-Qualification Process and the Tender Stage

- 1.4.1. The purpose of this Pre-Qualification Process is to identify Eligible Participants who have the required professional experience and capabilities in the following disciplines:
 - 1.4.1.1. Construction of TBM Tunnels (see Section 4.2 (Experience in the Construction of TBM Tunnels) below) (“**Tunneling Experience**”);
 - 1.4.1.2. Design and Construction of underground structures using Cut & Cover method (see Section 4.3 (Underground Structures: Cut & Cover Experience) (“**C&C Experience**”)).
 - 1.4.1.3. Design and Construction of underground structures using traditional tunneling methods (see Section 4.4 (Underground Structure: Mined Experience) below) (“**Mining Experience**”).
- 1.4.2. **Two Types of Infra #1 Work Packages.** As specified in **Annex “B”** hereto, it is currently anticipated that “Stage 1” will include eleven (11) Infra #1 Work Packages, all of which will include design and construction of: (i) TBM tunnels using TBM; and (ii) underground stations using Cut & Cover. Out of the expected eleven (11) Infra #1 Work Packages, four (4) Infra #1 Work Packages are expected to also include the design and construction of underground stations and/or crossovers using traditional sequential tunneling methods, all as specified in **Annex “B”** hereto.
- 1.4.3. **A Pre-Qualification Process for the Two Types of Work Packages.** The Tender Committee issued this Invitation with the aim of receiving two (2) types of Pre-Qualification Submissions:
 - (a) **Type “A” Submissions:** to demonstrate Tunneling Experience and C&C Experience only.
 - (b) **Type “B” Submissions:** to demonstrate Tunneling Experience, C&C Experience and Mining Experience.

(each a “**Type of Pre-Qualification Submission**”)

Participants may submit: (i) a Type “A” Submission only; (ii) a Type “B” Submission only; or (iii) both Types of Pre-Qualification Submission, in each case, in accordance with the Permitted Compositions (as defined below) and the restrictions specified in **Annex “C”** hereto. Without derogating from the foregoing, each of the Type “A” Submission and the Type “B” Submission are required to be submitted separately (as stand-alone Pre-Qualification Submissions), each including all Tender Forms and all other documents required to be submitted as part of a Pre-Qualification Submission.
- 1.4.4. **Composition of the Participant.** For their participation in any Type of Pre-Qualification Submission, Participating Entities are free to choose any one of the participation options specified in **Annex “C”** hereto, (“**Permitted Compositions**”), and are required to comply with the restrictions specified therein with respect to such Permitted Compositions. For avoidance of doubt, different compositions may be selected with

respect to each Type of Pre-Qualification Submission, all as specified in **Annex “C”** hereto.

- 1.4.5. **Announcement of Eligible Participants.** Upon the completion of its evaluation of the Pre-Qualification Submissions, the Tender Committee will announce, separately with respect to each Type of Pre-Qualification Submission, those Participants which the Tender Committee deemed to have successfully demonstrated compliance with the requirements of the Pre-Qualification Documents, and which were not otherwise disqualified thereby (“**Eligible Participant**”). The Eligible Participants will be invited to participate in the future Tenders (as explained below).

The Tender Committee may publish the identity of all Eligible Participants (including the Participating Entities participating therewith) to all Participants and in a press release.

1.5. Update Process

- 1.5.1. The process of awarding the Stage 1 Infra #1 Work Packages is designed as a phased, gradual process, expected to span several years.
- 1.5.2. In order to accommodate for changes which may occur in the market as well as in the structure of the Eligible Participants during such period, the Tender Committee intends to conduct two (2) update processes (each an “**Update Process**”), currently expected to take place during the course of 2027 and thereafter during the course of 2028, following which the Tender Committee will approve requests:
- (a) For changes in the composition of an Eligible Participant, including, *inter alia*, joining Entities, replacing Entities, or accepting the withdrawal from further participation of others; and
 - (b) For the pre-qualification of (additional, new) Participants which did not (nor did the Entities comprising such Participants) pre-qualify pursuant to this Invitation.
- 1.5.3. The Tender Committee will announce its intent to carry out each Update Process in advance, and in doing so will inform the Eligible Participants and prospective Participants of the procedure for conducting the Update Process, including the requests and information to be submitted and the qualifications which will be evaluated or reevaluated (if any) by the Tender Committee.
- 1.5.4. The provisions of this Section 1.5 (Update Process) do not derogate from the Tender Committee’s rights and prerogatives pursuant to Law and this Invitation, including the right to approve changes to a Participating Entity or changes in the composition of the Participants (including Eligible Participants) not as part of an Update Process .

1.6. Participation in Future Tenders; Expected Requirements

Without derogating from NTA’s and the Tender Committee’s rights, prerogatives and discretions pursuant to this Invitation (including Section 9 [DISCRETION AND PREROGATIVES OF NTA AND THE TENDER COMMITTEE], it is

expected that the following requirements and conditions shall apply in future Tenders and Agreements, all as shall be further specified under the Tender Documents:

1.6.1. Type “A” and Type “B” Tenders

- 1.6.1.1. Participants which were announced as Eligible Participants with respect to their Type “A” Submission (each a “**Type “A” Eligible Participant**”) will be invited to participate in Tenders for Work Packages which do not include Mined Underground Structures (as defined in Section 4.7 (Definitions) below) (“**Type “A” Tenders**”); and
- 1.6.1.2. Participants which were announced as Eligible Participants with respect to their Type “B” Submission (each a “**Type “B” Eligible Participant**”) will be invited to participate in Tenders for Work Packages which include Mined Underground Structures (as defined in Section 4.7 (Definitions) below) (“**Type “B” Tenders**”).

Notwithstanding the foregoing:

- 1.6.1.3. if: (i) a Type “B” Eligible Participant submitted only a Type “B” Pre-Qualification Submission; and (ii) none of the Participating Entities participating therewith participate with a Type “A” Eligible Participant, the Tender Committee may, at its sole discretion, allow such Type “B” Eligible Participant to participate also in Type “A” Tenders; and
 - 1.6.1.4. the Tender Committee may, at its sole discretion, allow Type “A” Eligible Participants to participate in Type “B” Tenders in which the scope of the elements (underground stations and/or crossovers) to be designed and constructed using traditional sequential tunneling methods, is, in the opinion of the Tender Committee, less significant.
- 1.6.2. NTA recognizes the special complexity of the Work Packages which include Mined Underground Structures, and as such, it intends to offer certain commercial incentives with respect to each of applicable Work Packages.
- 1.6.3. **Method of Participation in Future Tenders.** Eligible Participants will be permitted to participate in the Tenders only in the composition which was prequalified pursuant to this Invitation (i.e. the same Members, Experience Providers and Guarantors (if any)), or pursuant to an Update Process or as otherwise changed with the approval of the Tender Committee.

Notwithstanding the foregoing: (i) each Single Entity Participant; and (ii) each Member and Experience Provider participating as part of a Joint Venture Participant (each a “**Controlling Entity**”), will be permitted to participate in any specific Tender through a wholly owned subsidiary or second tier subsidiary (a “**Wholly Owned Subsidiary**”).

In such case, the applicable Controlling Entity will be required to support its Wholly Owned Subsidiary with sufficient financial, professional and technical means so as to enable it to perform its obligations and its applicable scope of the Works, should such be declared as the Successful Bidder in such Tender; all as shall be further specified in the Tender Documents.

- 1.6.4. Each Participating Entity which demonstrated compliance with a certain Professional Pre-Qualification Requirement, will be required to assume responsibility for the performance of the applicable part of the Work for which it was pre-qualified, and shall be entitled to do so either:

1.6.4.1. directly;

1.6.4.2. through a direct subsidiary thereof; or

1.6.4.3. through an Entity which is indirectly held by the applicable Participating Entity (provided that one hundred percent (100%) of all Means of Control of such Entity are Effectively held by such Participating Entity).

1.6.5. Additional Qualifications

1.6.5.1. Since the execution of the Infra #1 Work Packages will require, in addition to the construction of TBM tunnels, also the design thereof, and since the Participants are not required to present experience in the design of TBM tunnels in this Pre-Qualification Process, it is expected that an Eligible Participant which does not have such experience will be required, as a contractual obligation under the Agreement (if the Eligible Participant will be announced as a Successful Bidder in a Tender), to engage a designer or subcontractor which has such experience. Additional provisions with respect thereto, including qualifications with respect to such designer or subcontractor, will be specified in the Tender Documents.

1.6.5.2. Since the execution of the Infra #1 Work Packages will require, *inter alia*, cooperation and coordination with Israeli authorities, municipalities and localities, it is expected that an Eligible Participant which does not have experience in the execution of projects in Israel, including with respect to engineering coordination and obtaining permits, will be required, as a contractual obligation under the Agreement (if the Eligible Participant will be announced as a Successful Bidder in a Tender), to engage a subcontractor which has such experience and which is a “registered contractor” pursuant to the Registration of Contractors for Construction Engineering Works Law, 5729-1969, having at least one (1) of the following classification(s): (i) field 100 (construction), classification C-5 (unlimited) [100 5-λ]; (ii) field 200 (roads, infrastructures and development), classification C-5 (unlimited) [200 5-λ]; or (iii) field 300 (bridges), classification C-5 (unlimited) [300 5-λ].

Additional provisions with respect thereto, including qualifications with respect to such subcontractor will be specified in the Tender Documents.

- 1.6.5.3. Since the execution of Type “B” Infra #1 Work Packages will require, in addition to the construction of mined underground structures, also the design thereof, and since the Participants are not required to present experience in the design of mined underground structures in this Pre-Qualification Process, it is expected that an Eligible Participant which does not have such experience will be required, as a contractual obligation under the Agreement (if the Eligible Participant will be announced as a Successful Bidder in a Tender), to engage a designer or subcontractor which has such experience. Additional provisions with respect thereto, including qualifications with respect to such designer or subcontractor, will be specified in the Tender Documents.¹

1.7. Anticipated Schedule

The anticipated schedule for the Pre-Qualification Process is as follows:
